

ATHLETICS

Long Jump & Triple Jump

Installation Trough

The installation trough is made from aluminium. Its inside dimensions are 122x34x10 cm. The installation trough profile is cut approx.13 mm lower on both of the long sides. This means that when the tray is installed, the synthetic material can be fitted flush with the boards. This prevents the athletes from treading on metal with their spikes and possibly getting caught there. The troughs are equipped with distance boards on delivery. These boards ensure that the shape of the through is not effected during installation.

Order No. SP 40040 Dimension 122 x 34 x 10 cm (IAAF certified)

Order No. SP 40050 Dimension 122 x 30 x 10 cm

Order No. SP 40070 Dimension 122 x 20 x 10 cm

Blanking Beam Without Rubber

The blanking beam is made from aluminium. It measures 122 x 34 x 10 cm. Its height can be adjusted easily and comfortably by means of six stainless steel screws. This beam is delivered without rubber and can be covered on site.
